

Written Testimony of Moses Boone
Before the Connecticut General Assembly Environment Committee
March 1, 2010.

Testimony in Support of:
House Bill 5126, An Act Establishing a Chemical Innovations Institute at the
University of Connecticut;
House Bill 5130, An Act Concerning Child Safe Products

Dear Senator Meyer, Representative Roy, and honorable members of the Environment Committee,

My name is Moses Boone and I am a resident of new Haven.

What we do not know can hurt, maim and kill us. I am a product of my environment and therefore I am what I eat, drink and breathe. I am the father of two lovely daughters and the world has become an inhospitable place to bring children into and to raise them. Unfortunately we have no other choice because this is the only planet we know that can sustain life.

As a parent I can never have too much information as to how I can make the world safer for my daughters and their offspring. That is why I have chosen to commit my energies to doing everything possible to make the world as safe as possible through knowledge, engagement and advocacy as any and all things which reduce the quality and security of infants who cannot protect themselves from harm.

I support passage of:

HB 5126 **An Act Establishing a Chemical Innovations Institute at the University of Connecticut** and

HB 5130 **An Act Concerning Child Safe Products**

and if you have children or expect to have some you will also feel the necessity to protect our future generations.

Thank you,
Moses Boone
